

When Law Meets Innovation: Regulatory Challenges in Smart Mobility

Dr. Gerard J. Ritsema van Eck
 Assistant professor and post-doc
 University of Groningen, Faculty of Law

This poster

This poster showcases selected legal research from SMILES. Want to learn more? Come chat with me!

Period involved

Dr. Gerard J. Ritsema van Eck participated in the SMILES project from April 2022 through December 2024.

Smart lampposts

The municipality of Oldambt deployed lampposts equipped with cameras and smart sensors to measure traffic flows, raising significant data protection concerns

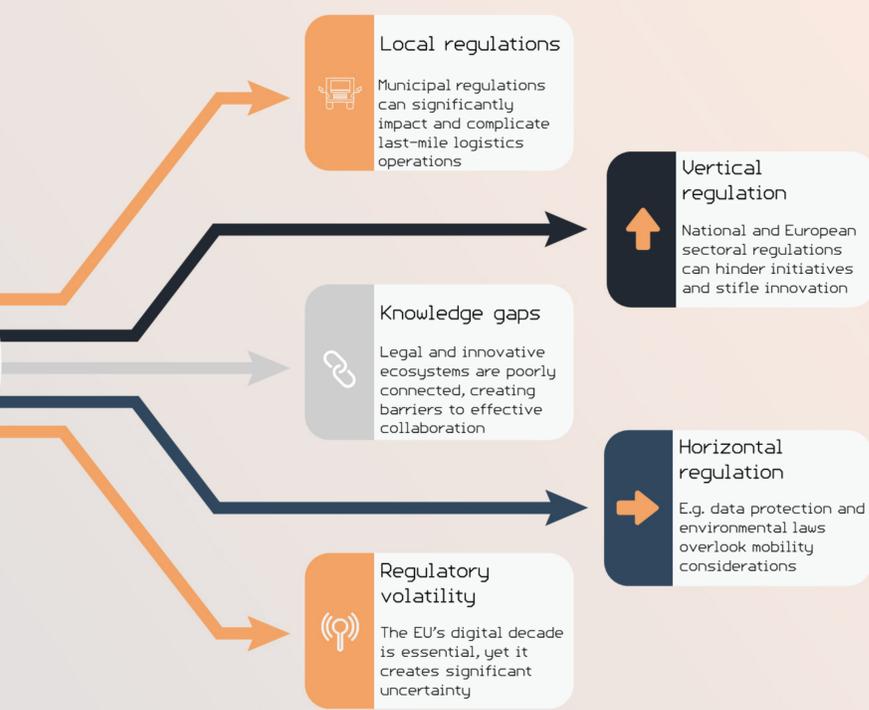

Rural shared mobility

Students participated in a multidisciplinary research project to develop innovative solutions for increasing shared mobility in rural areas, which are currently underserved and at risk of losing additional public transport options

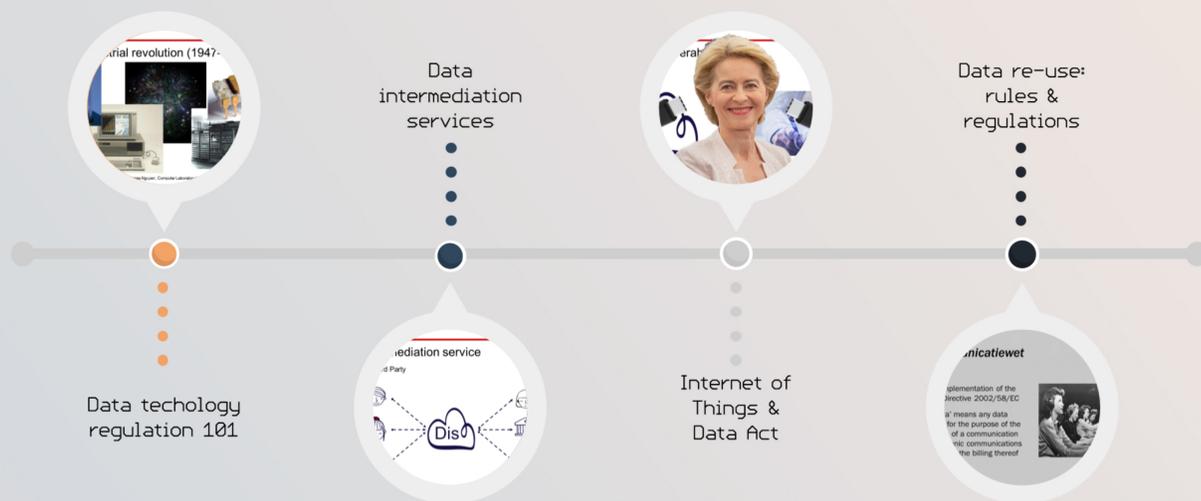

Hydrogen ships

Hydrogen represents a promising clean fuel for transport and fishing vessels. However, existing legal frameworks for certification and liability vary significantly in their suitability for hydrogen applications

KPN workshops

A series of four interactive workshops held at the KPN Data Services Hub explored regulatory challenges and opportunities of current developments in data technology law
